MediTop | ExcellENT

The ExcellENT unit offers a design that optimally uses its space and is ergonomic and hygienic. This unit differs itself from other models due to the ease of installation and the extremely wide variety of customization and is therefore very suited for all customers.

Optimal

This highly requested and totally equipped unit comes in 3 models. As a result, it adapts perfectly to everyone's wishes. Almost all additional functions can be fully integrated in the ExcellENT units, allowing the

> It adapts perfectly to everyone's wishes

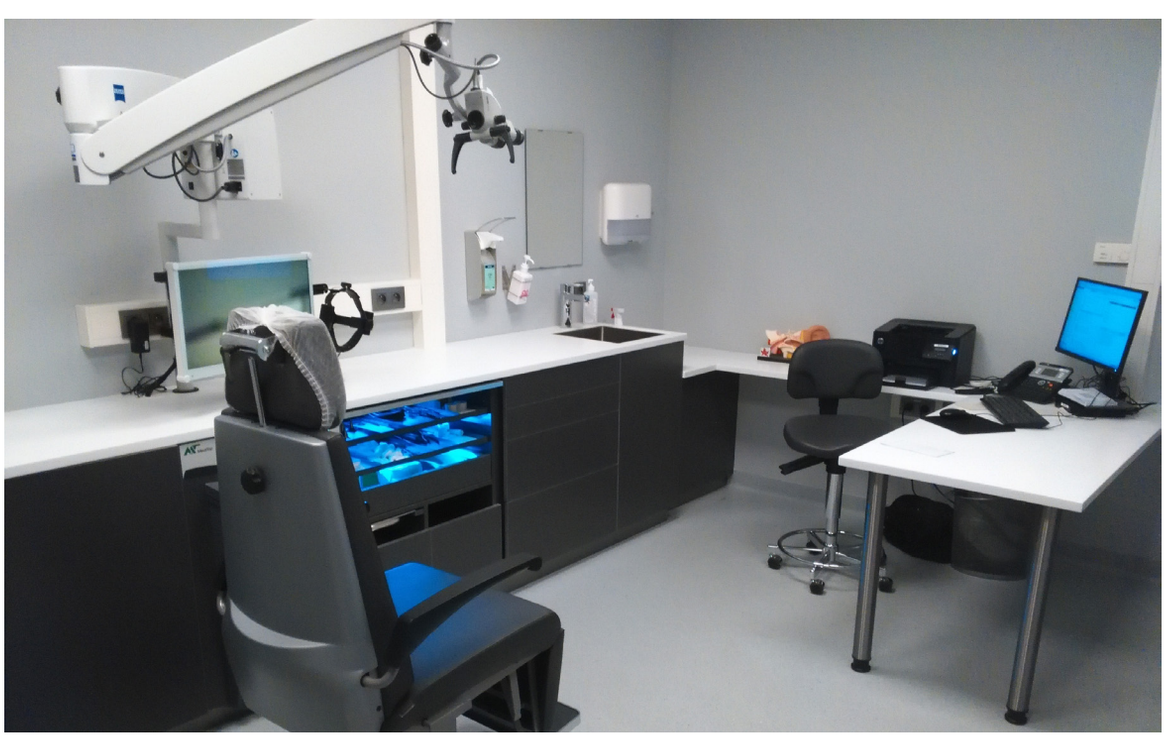
doctor to work very smoothly and ergonomically. The unit also offers a lot of storage space for instruments and disposable material.

Hygienic

Due to the use of easy-to-maintain materials of high quality and its easy-to-clean sleek design, these units score very high in terms of hygiene. The units are virtually seamless and the absence of wall and floor gaps allows for a quick and thorough cleaning of the unit with the most commonly used household products.

Customization

The ExcellENT models are designed in such a way that the provided spaces can be used in an optimal way.



The units can all be expanded with more blocks, that add new functions to the base unit. Usually a sanitary block is added. With the extra additions, the worktops also expand and thus provide more work space.

The provided spaces can be used in an optimal way

Wide range of material finishes

This model is available with a Marble Top finish or with HPL (High Pressure Laminate). When choosing HPL, a whole range of design possibilities such as wood/ metal/stone looks become available.

A wide selection of integrated functions

The ExcellENT can be equipped with a wide selection of integrated functions to accommodate specific requirements.

The ExcellENT family

ExcellENT Microscopy
The ExcellENT Microscopy units are specially designed for treatments in mainly otologic settings, where patients are examined while lying down.

To facilitate the examinations, the microscopy units are equipped with 2 instrument parts; 1 on each side of the extended therapy section. These units can be equipped with many more options, which makes working with these units even more pleasant.

ExcellENT II
The ExcellENT II unit is a simplified version of the ExcellENT unit, ideal for settings where a high degree of customization and integration of options is not required.

This unit nevertheless offers the possibility to integrate the most requested options and thus allows smooth and ergonomic work. The ExcellENT II unit has a smaller touchscreen, a thinner top and only 4 handpiece holders instead of 5.

ExcellENT IIS
The ExcellENT IIS unit is the smallest unit within the ExcellENT group, making the integration of extra options more limited.

Despite this limitation, this unit also allows smooth and ergonomic work.
