MediTop MT I 000

MediTop I MT 1000

The MT1000 is a mobile ENT unit that is easily moved from room to room and is perfect for different settings. A vast number of functions can be integrated into this small and nimble unit making it very versatile. It is a perfect mobile solution for small practices and the A&E department.

User friendly

The touchscreen panel is intuitive in use and provides the user-friendly concept of the MT1000 ENT unit. Instruments can be placed ready to use and always within reach of the user. The instruments placed in the instrument holders are automatically activated when they are taken out of it. When instrument is placed back in the instrument holder the function of it shuts down automatically as well.

Instruments always within reach.

Flexibility

The MT1000 is also available as a fixed model, the result of it is that it can be executed with a microscope. This provide a complete and versatile treatment unit for rooms with limited space.

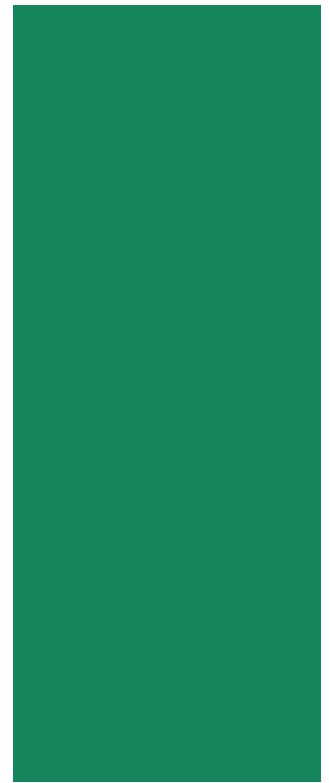

Quality and versatile

The MT1000 is produced with only high-quality materials and craftsmanship. Each unit can be upgraded with new or extra functions. This includes adding new modules or integrating new equipment.

Customize

Every ENT unit is built according to the requirements of the customer and the Customer has an almost endless possibility to choose the colour scheme and materials. The dimensions of the ENT unit can also be changed to accommodate specific requirements of the room. This all provides a unique tailor fit finish.
